

DESIGN BLUEPRINT · FIGMA MASTER PROMPT

A complete, paste-ready brief for designing every Vita screen. All tokens and screens below match the live app — calm, warm, dark + sage.

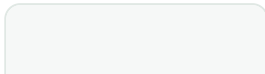

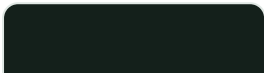

1 · Screen & navigation hierarchy

Vita (mobile app)

- Onboarding (LIGHT theme, 20 steps, full-screen)
 - Top progress bar + Back / voice-mute
 - Per-step emoji "character" hero + animated background blobs
 - 0 Name · 1 Email · 2 DOB(→age) · 3 Goal · 4 Sex
 - 5 Height(cm⇌ft) · 6 Weight(kg⇌lb) · 7 Target weight(conditional)
 - 8 Activity · 9 Equipment(multi) · 10 Days/wk · 11 Min/session(slider)
 - 12 Limitations(multi) · 13 Diet prefs(multi) · 14 Allergies · 15 Meals/day
 - 16 Cooking freq · 17 Workout time(picker)
 - 18 Stress · 19 Sleep · 20 Mood → "Save my plan"
- Plan-generating loading (sage spinner + reassuring copy)
- HomeShell (DARK + sage · bottom nav + "Log meal" FAB)
 - [Tab 1] Dashboard
 - Header: greeting · name · 🔥 streak · avatar
 - (optional) crisis / refer-to-professional banner
 - Mood check-in card ⇌ acknowledged-reply card
 - Today rings: Calories · Water · Steps + "250 ml" + reset
 - Weather & hydration card
 - Today's workout gradient hero → Player
 - "Your week" day strip (✓ done) → Player
 - Daily targets donut (kcal-left) + P/C/F rows
 - Focus card · Mind check-in card · Disclaimer
 - [Tab 2] Coach: header · chat bubbles (user/assistant) · typing · composer
 - [Tab 3] Plan: targets · expandable workout week · sample meals
 - [FAB] Log a meal: Photo⇌Describe · preview/text · Analyze · result · error
 - [pushed] Workout Player (LIGHT): phase chip · animated demo · timer ring
 - prev/pause/skip · completion screen

2 · Design tokens

Brand & dark surfaces

 sage #6B9080 · primary	 deepSage #2E3D38 · text/light	 sageLight #9CC3B2 · accent/dark	 softBackground #F6F8F7 · onboarding
 darkBg #14201B	 darkSurface #1E2C26	 darkSurfaceAlt #263A32	

Accents & semantic

 blue #5B8DB8 · water/carbs	 orange #E39A53 · steps/core	 pink #D16BA5	 purple #7E6CC4 · mobility
 green #6BA368	 red #E0566E · cardio	 fat #D9A86C · macro	

System	Spec
Macros	Protein #6B9080 · Carbs #5B8DB8 · Fat #D9A86C
Rings	Calories #6B9080 · Water #5B8DB8 · Steps #E39A53
Exercise categories	Strength #6B9080 · Lower #5B8DB8 · Core #E39A53 · Cardio #E0566E · Mobility #7E6CC4
Typography	Humanist sans (Inter / SF Pro / Plus Jakarta). Display 24–26/w800 · Title 16–18/w700–800 · Body 14–15/w400–500 · Caption 11–12/muted; body line-height ~1.35
Spacing	4 / 8 / 12 / 16 / 20 / 24 · screen padding 20 · card padding 16–22
Radius	pills/chips 20–24 · cards 18–24 · inputs 14–16 · sheets 24 (top)
Elevation	flat default; hero card one soft colored shadow (sage @30%, blur 24, y+12); dark cards use 1px white-6% borders
Icons / mood	rounded Material icons; mood scale emoji 🥱 😬 😏 😊 😄

3 · The master prompt

Paste the block below into Figma AI (or any design tool). For tools with input limits, feed **Foundations + Components first**, then one screen section at a time.

You are designing Vita, a mobile **AI wellness & fitness coach** app (iOS + Android, 390×844 baseline). Produce a complete, polished, production-quality UI kit and all screens below as one cohesive design system. Follow this brief exactly.

Product. Vita turns a friendly 20-step onboarding into a personalized plan: daily calorie/macro targets, a weekly workout program with a guided player, food logging by photo or text, water + step + mood tracking, weather-aware hydration advice, and an AI coach chat. Tone: **calm, warm, encouraging, trustworthy** — a supportive coach, never a shouty fitness app. Audience: everyday adults building a wellness routine.

Design language. Two contexts, one family: **Onboarding is light & airy** (welcoming first impression); the **main app is dark + sage** (focused, premium). Soft, rounded, generous spacing; large rounded corners; soft shadows. **No neon, no harsh gradients.** Nature-inspired sage palette. Friendly micro-personality: emoji "characters", gentle motion, encouraging microcopy.

Color — brand: sage #6B9080 (primary), deepSage #2E3D38 (text on light), sageLight #9CC3B2 (accent on dark), softBackground #F6F8F7 (onboarding bg). **Dark app surfaces:** bg #14201B, surface #1E2C26, surfaceAlt #263A32; text white / white-70% / white-38–54%. **Accents:** blue #5B8DB8, orange #E39A53, pink #D16BA5, purple #7E6CC4, green #6BA368, red #E0566E.

Semantic: macros P #6B9080 / C #5B8DB8 / F #D9A86C; rings Calories #6B9080 / Water #5B8DB8 / Steps #E39A53; categories Strength #6B9080, Lower #5B8DB8, Core #E39A53, Cardio #E0566E, Mobility #7E6CC4.

Type: humanist sans (Inter / SF Pro / Plus Jakarta Sans). Display 24–26/w800 · Title 16–18/w700–800 · Body 14–15/w400–500 · Caption 11–12/muted; body line-height ~1.35. **Spacing:** 4/8/12/16/20/24; screen padding 20; card padding 16–22. **Radius:** pills/chips 20–24 · cards 18–24 · inputs 14–16 · sheets 24 top. **Elevation:** flat default; hero cards one soft colored shadow (sage @30%, blur 24, y+12); dark cards use 1px white-6% borders. **Icons:** rounded Material. **Mood scale:** emoji 🥱 😞 😟 😊 😄 .

Components (build the library first): Buttons (filled sage r14 / white-on-color hero / tonal / outlined / icon / FAB.extended "Log meal"); **Stat ring** (circular progress, stroke 7, rounded cap, center value+unit, icon+label below) in Calories/Water/Steps; Cards (plain / gradient hero / info card with emoji+title+body / weather card with left temp column + advice); Chips (🔥 streak, WORK/REST phase, single & multi select, week day-card with ✓); Segmented control (Photo/Describe); Macro pill (grams + P/C/F letter, macro-tinted); Donut chart (3 macro segments, "kcal left" center); Chat bubbles (assistant left/darkSurface, user right/sage, + typing bubble); Composer (pill field + circular send); Inputs (text, slider 1–10 with value, measurement field with cm/ft & kg/lb toggle, time picker, DOB picker); Bottom nav (Home/Coach/Plan, dark, sage indicator, center FAB on Home); Banners ("not medical advice" + crisis resources); **Animated**

exercise demo (square: concentric pulsing rings + bobbing category icon + category-label pill, tinted per category).

States per interactive screen: Empty · Loading · Default · Error · Success/Done · Disabled.
Onboarding = light, main app = dark.

Screens to deliver: (1) Onboarding — a reusable step template (progress bar, character hero, animated blobs, question, input, Back+Continue) plus variants: single-select, multi-select chips, slider, measurement+unit-toggle, time picker, and final "Save my plan". (2) Plan-generating loading. (3) Dashboard — header+streak, mood check-in + acknowledged state, Today rings + water controls, weather/hydration card, workout gradient hero, week strip with ✓, macro donut + targets, focus & mind cards, disclaimer. (4) Coach chat — header, both bubble types, typing state, composer, first-message empty state. (5) Plan — targets, expandable workout week, sample meals. (6) Log a meal — Photo & Describe modes, analyzing state, editable result card, error. (7) Workout Player — WORK and REST variants (different accent), animated demo, timer ring, controls, + completion screen. (8) Bottom-nav shell showing all 3 tabs with the FAB.

Accessibility & trust: WCAG-AA contrast on dark; tap targets $\geq 44\text{px}$; never color-only (pair icon/label); persistent "not medical advice" footer; calm, non-judgmental copy.

Output: a structured Figma file — Page 1 Foundations (colors as variables, type styles, spacing, elevation), Page 2 Components (library with variants & states), Page 3 Onboarding (light), Page 4 Main App (Dashboard, Coach, Plan, Log meal, Workout Player — dark), each screen on a 390×844 frame, named clearly, using Auto Layout and shared variables for every token.

4 · Suggested Figma file structure

 00 Cover / README

 01 Foundations (colors as variables, type styles, spacing, radius, elevation)

 02 Components (buttons, rings, cards, chips, nav, chat, inputs – variants)

 03 Onboarding (step template + variants, LIGHT theme)

 04 Main App (Dashboard, Coach, Plan, Log meal, Workout Player – DARK)

 05 Flows / Prototype (onboarding → plan → home → workout;
home → log meal; home → coach)

Per-screen layout order (top → bottom)

Screen	Stacked sections
Dashboard	Header(greeting+streak+avatar) → [banner] → Mood check-in → Today rings(+water) → Weather → Workout hero → Week strip → Macro donut+targets → Focus → Mind → Disclaimer
Coach	Header( + "Vita Coach") → message list (assistant left / user right) → typing → composer(field + send)
Plan	"Your plan" → Daily targets(kcal/P/C/F) → Workout week (expandable tiles → exercises + Start) → Sample meals
Log a meal	Segmented(Photo/Describe) → preview or text → Analyze → result(label, kcal, P/C/F pills, Redo/Add) → error
Workout Player	App bar(focus+mute) → segment progress → phase chip → "Exercise X of N" → animated demo → name → set/reps → timer ring → controls(prev/pause/skip) → completion
Onboarding step	Progress bar → character hero → question → input(varies) → Back + Continue
